

October 11, 2018

Tin Roost, 840 W Penn Street, North Liberty, IA

October 12, 2018

Nordstrom's Automotive, Garretson, SD

**6 Hour Hybrid Dismantlers Training Class
by Salvage Wire expert Andy Latham**

www.IowaAutomotiveRecyclers.com

To register Only \$129 per Attendee

Salvage Wire has designed a one-day training course for all auto recyclers to give them the *knowledge, information and resources* to safely and confidently handle hybrid vehicles - right from the first notification of acquisition through collection, storage, depollution and dismantling.

Learn what to do with these vehicles and **what NOT to do**, learn how to keep yourself, your colleagues, the public and your business safe from injury, harm or fire. This WAMITAB accredited training is essential for drivers, yard technicians, depollution teams, dismantlers, leaders and managers.

You have a choice - book training and education and stay safe, or.....!

helping automotive recyclers become leaders in their industry

High voltage vehicles come in all shapes and sizes, performance and range. From the very small, like the Renault Twizy, to high-performance hyper sports cars from McLaren and Ferrari.

These vehicles are running battery voltages up to 400vDC with plans to move to 800vDC in the near future and in excess of 1000vDC in a few years time. More than enough to cause serious issues if handled incorrectly as a result of accident or incident.

Why are we interested in these vehicles?

Toyota have already sold over 10 million hybrid vehicles. Outside of the USA, governments are proposing, or have already legislated, that no brand new internal combustion engine vehicles can be purchased after a specific date. **Handle it wrongly and it WILL kill you!**

Salvage Wire has designed a one-day training course for all auto recyclers to give them the *knowledge, information and resources* to safely and confidently handle hybrid vehicles - right from the first notification of acquisition through collection, storage, depollution and dismantling.

Learn what to do with these vehicles and **what NOT to do**, learn how to keep yourself, your colleagues, the public and your business safe from injury, harm or fire. This WAMITAB accredited training is essential for drivers, yard technicians, depollution teams, dismantlers, leaders and managers.
